Compact, Stylish Design

The attractive, slim, lightweight design of the instrument - weighing less than 12 kg - suits virtually any interior decor and occupies less space than most coffee tables. No piano movers required.

Advanced Wave Memory (AWM) Stereo Sampling

The AWM (Advanced Wave Memory) is a sampling system which creates sound close to that of an acoustic instrument by using digital technology to record the instrument sound and applying high-quality digital filter technology to these recorded audio samples. AWM Stereo Sampling creates a more spacious, deeper, and richer sound by using a pair of waveforms (L and R), obtained via a stereo recording process.

Built-in Stereo Speaker System

This instrument uses highly efficient amplifiers that pack more sound into a lighter digital piano. With 6 watts per channel, these keyboards are ready to go whenever you are.

50 Preset Piano Songs

A selection of 50 different piano songs is provided for your listening pleasure. These recordings were chosen for their beauty as well as their practicality - since many of the songs are classic piano pieces, anyone taking lessons can listen to them for reference.
